It has been available in the Autodesk Product since version 2.0.0. It is available for Windows and OS X operating systems. Features Autodesk

Project Downloader is an Autodesk application. The application is used to download a file or group of files which are present on a computer from the website where the file is hosted. The application provides the necessary settings which can be used to access the account and acquire a licence. Once the licence is acquired the application can be run for the first time. Autodesk Project Downloader uses the Autodesk Forge server, an application and API that allows software developers to upload and publish their Autodesk applications to the cloud. The application makes use of the following Forge features: Resource sharing: developers can share resources, such as app icons, screenshots, documentation, or videos. Application management: developers can manage their applications, including name, description, app icon, and upload time. Forge library and app module: Autodesk Project Downloader can be installed to share development resources with other Forge applications. Versions Pro Since the initial release of Autodesk Project Downloader, Autodesk released additional features to it to improve the user experience. Some of these additional features are: Application: Time tracking: allows the user to log time to their application. Time tracking is applied only when a user registers a new application. Licence management: Licence creation: allows the user to create a new licence for the application. The licence includes the name of the application, a description, a web address, the licence type, the licence key, an autodesk-account to track the data, and a thumbnail image. Licence reset: allows the user to reset a licence to a new licence. This feature is called once the application is started for the first time. Licence search: allows the user to search for licences based on name and description. This feature is available only 82157476af
